DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, 16-19, 24-30, 35-37, 42-46, 51-52, 69-74, drawn to methods for detecting a malignant tumor, diagnosing glioma, predicting a recurrence of a malignant tumor, using protein, classified in class 435, subclass 7.1.
 - II. Claims 1-10, 12-18, 20-29, 31-36, 38-45, 47-68, drawn to methods for detecting a malignant tumor, diagnosing glioma, predicting a recurrence of a malignant tumor, using mRNA, classified in class 435, subclass 6.

It is noted that several claims are grouped in both groups. These claims will be examined to the extent that they are directed to the elected subject matter.

2. The inventions are distinct, each from the other because of the following reasons:

The inventions of Group I and II are patentably distinct methods because they each have different objectives, different uses, different reagents and different method steps. The method of Group I is for protein analysis. Alternatively, the method of Group II is for nucleic acid analysis. The expression of a nucleic acid and a protein do not necessarily coincide, furthermore, their means of detection varies. Therefore the methods are distinct over one another.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by the different classifications and their divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Jeanine Goldberg whose telephone number is (703) 306-5817. The examiner can normally be reached Monday-Friday from 8:00 a.m. to 5:30 p.m.
- If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Jones, can be reached on (703) 308-1152. The fax number for this Group is (703) 305- 3014.
- Any inquiry of formal matters can be directed to the patent analyst, Pauline Farrier, whose telephone number is (703) 305-3550.
- Any inquiry of a general nature should be directed to the Group receptionist whose telephone number is (703) 308-0196.
